

...WE CAN CREATE SOMETHING REMARKABLE.

WITH  STONE AND YOUR IMAGINATION...

WHERE R STONE COMES FROM
The R Stone team has been working with stone for over 30 years. Stone is our business. It's what we know. We're the experts. R Stone products come from quarries, mountains, fields and woodlands throughout New England. We use hands-on experience to ensure superior quality, selecting stones for their natural colors, variations and other beautifully unique characteristics. We capture the best New England has to offer.
When it comes to thin stone, we use custom thin stone saws operated by the areas most experienced craftsmen to achieve the finest quality cut. Our employees bring years of experience in the field and stone industry, strengthening our commitment to quality customer service.

NATIVE. NATURAL. BEAUTIFUL.

WE HARVEST THE FINEST STONE
NEW ENGLAND HAS TO OFFER.
THEN WE OFFER IT TO YOU.

At R Stone, our expert craftsman have been harvesting and cutting stone for over 15 years. From quarries, mountains, fields and woodlands, we select only the best New England has to offer – 100% native natural stone.

R Stone has everything you need for innovative and unique interior and exterior residential, commercial and landscape applications – from rustic fieldstone flagging for patios and pool surrounds to thin stone home or building exteriors and fireplaces. We offer wall stone, flagging, full thickness veneer and thin stone veneer. Our stone is hand selected for color, the beauty of its natural variations, and superior quality.

Whether you're a homeowner, architect, builder, or contractor, our natural stone products will help you realize your vision to create something remarkable. Beautiful designs that will stand the test of time.

USES & BENEFITS OF STONE

Thanks to several innovations in the stone industry, you can now enjoy the distinctive beauty of natural stone harvested in New England in a variety of applications – both interior and exterior. Natural stone offers a true natural style; something that cannot be duplicated in a laboratory or come from a mold. Stone is kept in its natural state, with its many color and texture variations, and is cut to suit a variety of uses.

VALUE

If selecting our thin stone veneer for your project, you'll find it easy, efficient and economical. Our thin stone comes ready to use; some additional cutting or finishing may be required. It effectively provides up to five times the coverage of traditional 4" to 6" stone veneer of equivalent weight, with no footing requirements. Its profile measures just ¾" to 1¼". Thin stone is also significantly lighter and easier to handle, resulting in faster installation and reduced labor costs. It can actually be a more cost-effective alternative to man-made or cultured stone. In addition, natural stone is simple to care for, has an appearance that literally improves with age and can last a lifetime.

STONE COLLECTION

HOW TO CHOOSE STONE

Unlike manufactured stone, R Stone veneer and thin stone products are 100% natural stone. Variations in natural stone's broad range of color, pattern, and texture are visually interesting and impossible to replicate. And, because it comes from the earth, from eco-friendly compositions, it is a natural choice. When choosing stone for your project, consider the style you want to achieve as well as color and finish.

PACKAGING

FLATS

- 8 sq. ft. / pallet
